

Wax-Tape® Primer: White

Description:

Trenton Wax-Tape® primer (white) is a blend of microcrystalline waxes, plasticizers, and corrosion inhibitors (no clay fillers). It has a paste-like consistency and is designed to displace moisture and wet the surface, ensuring a continuous anticorrosion film on the surface prior to wrapping with Wax-Tape® wrap. Wax-Tape® primer (white) remains spreadable even in cold conditions.

End Use:

Trenton's Wax-Tape® primer (white) is recommended for use under pigmented Wax-Tape® wraps such as Wax-Tape® #2 wrap (white) when used on aboveground applications.

Application Procedures:

Wire brush and wipe the surface clean and as dry as possible. Apply the Wax-Tape® primer by hand, rubbing and pressing the primer firmly onto the surface, especially if the surface is wet, cold or rusty, to displace any moisture and ensure adhesion to the surface. Trenton Wax-Tape® wraps may be applied immediately.

Packaging:

1-gallon cans (4 gallons/case) 32 lbs/case

Specifications:

Color:	White
Coverage (approx.):	100 sq ft/gal (2.5 m ²)/L
Flash point:	350° F minimum
Temperature of product for application:	40° F - 100° F
Dielectric strength:	>100 volts / mil
Max operating temperature:	120° F
Minimum substrate application temperature:	0° F
Solids content:	100%

Advantages:

- Goes on easily by hand
- Displaces moisture
- Penetrates surface rust
- Facilitates wetting of surfaces
- Only a thin coat is required
- No waiting for drying or curing
- No mixing, thinning or stirring
- Compatible with other coatings
- Nontoxic, nonflammable, noncarcinogenic, no VOCs

Here Trenton's Wax-Tape® #2 wrap is being applied over the Wax-Tape® primer (white). Notice that the Wax-Tape® primer can be applied to the pipe after only minimal surface preparation.
